

1. Write a Python expression to calculate the **sum, difference, product, and quotient** of two numbers.
2. Find the **remainder** when one number is divided by another.
3. Compute the **square and cube** of a given number.
4. Calculate the **average of three numbers** using operators.
5. Convert **total seconds** into minutes and seconds using // and %.
6. Find the **area of a circle** given the radius.
7. Calculate **simple interest** using the formula

$$SI = (P \times R \times T) / 100$$
8. Compute the **power of a number** using the exponent operator.
9. Find the **last digit** of a given integer.
10. Calculate the **total and percentage** of 5 subject marks.
11. Write a program to demonstrate the use of += and *= operators.
12. Update a variable by adding 10 and then multiplying by 2.
13. Write an expression using /= to reduce a number.
14. Use assignment operators to swap two numbers **without using a temporary variable**.
15. Modify a variable value using %= operator.
16. Find the roots of a quadratic equation.
17. Accept basic salary from user. Calculate DA(50%), HRA(20%) and find the gross salary.
18. Accept temperature in Fahrenheit and convert it into Celsius and vice versa.
19. Find the sum of n natural numbers. “n” must be inputted by the user.
20. Accept two numbers and perform the all logical, bitwise operation and display the result.

21. Write a python program to evaluate the expression $4x^4 + 3y^3 - 9z + 6$.
22. Write a python program to take a input in uppercase and change it to lower case.
23. Ask the user to enter a number x. Use the sep optional argument to print out x, 2x, 3x, 4x, and 5x, each separated by three dashes, like below.

Enter a number: 7

7---14---21---28---35

24. Input 3 digit number and calculate the sum of the digits using // and % operator.
25. Input 3 digit number and reverse the number using arithmetic operators.
26. Input two digit number and exchange its digits using operators.
27. Input the number of days. Convert it into weeks and remaining days using // and % operator.
28. Input an amount in rupees and calculate the number of \$500, \$200, \$100 and \$50 notes and remaining rupees using arithmetic operator.
29. Input a 4 digit number and calculate the sum of first and last digit.
30. Input a 3 digit number and find the 100th digit, 10th digit and unit place digit.
